

## **Double Gemstone Amulet** Materials

This project combines two cabochons with a decorative bail. Bring two or more stones of different sizes and shapes and complementary colors. (Pear shapes work especially well.) Sheila will help you select the combination that will be most effective for your design. There will also be stones available in the classroom and from vendors.

The granulated bail will be made of Argentium. We will spend time focusing on Argentium's challenges and advantages. Making granules will be reviewed.

If you are confident and feel like splurging, a few accents of 22kt gold can bring a real wow factor to this project. This is completely optional.

The amounts of metal shown here will accommodate a wide range of designs. If possible, more is always helpful.

### Argentium

24ga sheet, 6x4"

20ga round wire, 24"

22ga round wire, 24"

18ga round wire, 12"

Optional: Granules, 1.0mm, 0.9mm (available from Rio Grande and Otto Frei)

### Fine silver

26ga sheet, 2x5"

22kt gold (optional)
